If you have an **urgent issue after business hours**, please call 508-771-9599 for our 24-hour on-call nurse line.

Resources for Education and Self-Management

ACTIVELY PARTICIPATING IN YOUR CARE

Talk to us!

- Give us feedback on how the office works through surveys or the comment box.
- Talk with your care team about your health problems and concerns.
- Ask your team how you can best take care of yourself. Take charge of your health by assuming responsibility for aspects of your care.
- Follow the Care Plan your team has developed with you, and let your team know when you can't.
- Call Duffy Health Center for advice before going to the Emergency Room in a non-emergent situation.

Take care of yourself!

- Set health goals that you feel you can reach.
- Do things to reach your goals and lower your health risks.
- Join support groups with people like you.

Learn before you decide.

- Look at different treatment options, their risks, and benefits.
- Create an action plan with support from your care team.

Be safe.

- Tell us about any medicines, supplements, and herbal or holistic products you take.
- Talk with us about any safety concerns you have.

Identify solutions. Problem solving steps:

- **Identify the problem.** What has changed? What is going to change?
- **Find solutions.** Think of ways to correct the problem based on your experiences, tools, and the support you have available.
- **Check in with your care team** if you have questions or want some support. Let them know what in your life has changed and share any issues you are experiencing. Ask them for ideas about new tools that could help you.
- **Take action.** Choose how to solve the problem once you have options. Set a realistic action plan. Pick a solution you can handle; get help if you need it. Check to make sure your solution choice works. Try something different if one solution doesn't work.

HOW TO PREPARE FOR AN APPOINTMENT

- ✓ Make a list and prioritize your concerns.
 - Put the most important topics first on the list so you will bring them up at the start of the appointment.
 - Write down anything you were confused about at the last visit.
- ✓ Take information with you to the visit.
 - Bring a list of your medications and supplements (name, dose, frequency) or bring your medications with you.
 - If you are experiencing any side effects, write them down and bring to your appointment.
- ✓ Keep your care team up to date.
 - Think about what has changed since your last appointment, or recently. Some examples are weight, sleep, appetite, or energy level.
 - If you have gone to the Emergency Room or Urgent Care, let the care team know when and why. If you had medication changes, it's helpful to bring the discharge paperwork with you.
- ✓ Request an interpreter if you need one.

Talking with your care team: this website has worksheets that will help you bring information to the Duffy Health Center. <https://www.nia.nih.gov/health/medical-care-and-appointments/talking-your-doctor-worksheets>

- ✓ Recording your family health history.
- ✓ Questions to consider when choosing a new doctor.
- ✓ Life changes to discuss with your doctor.
- ✓ Prioritizing concerns to share with your doctor.
- ✓ Tracking your medications.

Role of Connections Case Managers

Duffy Health Center is committed to providing the best treatment for our patients. **No patient will be turned away due to an inability to pay for services.**

My insurance is active

Help with new or returning patient paperwork

Help you pick a PCP

I need to renew my insurance

Help to complete application

Help you pick a PCP

I do not have insurance

Help to complete insurance application

Set up sliding fee scale

Help you pick a PCP

Notice of Availability of Financial Assistance

In most cases, patients' bills are covered by their insurance. If you have health insurance, including Medicare and/or Medicaid, Duffy Health Center will submit claims on your behalf. Under certain circumstances, a patient may be eligible for a **sliding fee scale**. Persons who are on the sliding fee scale will need to reapply at least once a year. Connections staff will help you get the required proof of income of your household, which can include:

- Recent tax form
- W2 form
- Recent check stubs
- Other proof of income

In some cases, co-payments or discounted fees may be charged. Payment for services will be requested at the time of your visit. Cash, credit card, personal checks, money orders, or cashier's checks are accepted.

Non-U.S. citizens who are not eligible for a social security number (SSN) or do not have documentation of their immigration status may still qualify for MassHealth Limited or the Health Safety Net. In order to apply, non-U.S. citizens need to show:

- Proof of their income; and
- Proof of identity to be eligible for the Health Safety Net

Non-U.S. citizens do not have to submit their immigration documents with the application if they are applying only for their children but are not applying for any health coverage for themselves.

If individuals do not have pay stubs or tax records, they can prove what their income is in other ways, like giving us a signed statement from their employer containing the gross (before taxes and deductions) pay and hours worked.

Applications and the information on them will be kept confidential. This means that:

- Names and addresses will not be sent to immigration enforcement officials **and**
- We will not match information with other agencies if individuals do not have social security numbers.

Connections staff will help you in contacting insurance companies about changes. Inform Duffy Health Center and your insurance company of any changes in:

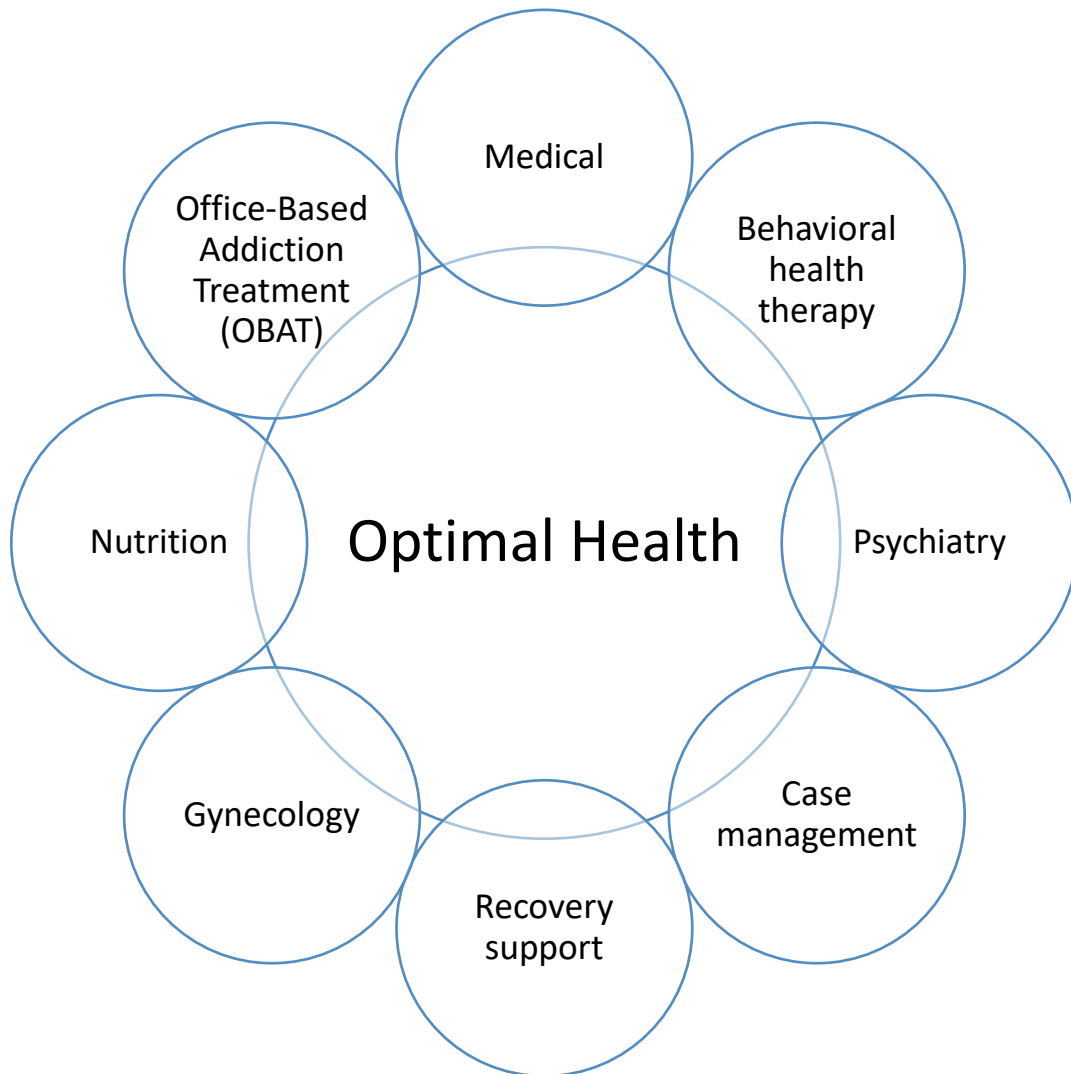

- Address
- Phone number
- Monthly income
- Insurance status

The Duffy Health Center reserves the right to reschedule your visit, refer you to another practice, or discharge you from the practice if you do not provide us with the required information.

Evidence-Based Care, Services Provided, and Telehealth Availability

Duffy Health Center provides care that is based on up-to-date research and knowledge, otherwise known as “evidence-based care.”

These services are available at the Duffy Health Center to help patients reach optimal health:

To provide flexibility and choice in how the service is delivered, appointments are available through telehealth. This may include video and audio connection.

Duffy Health Center uses MyChart as the patient portal, or a way for you to access your medical information.

Duffy Health Center as a Safe Space

To keep the Duffy Health Center a safe space and ensure that everyone has a positive experience:

- Thank you for not smoking in or within 25 feet of the building entrance – our health care facility offers a clean air environment for all to share.
- Limit your cell phone use to the stairwell or step outside the building.
- Remain aware of your personal belongings. Duffy Health Center is not responsible for lost or stolen items.
- **Theft and drug dealing are crimes. We abide by the law and require patients to do the same.**
- **Discussion about drugs or illegal activities is not allowed.**
- **Anything that looks like or can be used as a weapon is not permitted on the premises.**
- As with all buildings that are open to the public, Duffy Health Center expects that you will:
 - Be honest and trustworthy.
 - Respect the rights of others.
 - Take responsibility for your actions.

Duffy Health Center's front office staff is here to assist you. They understand that you may have medical and other issues that are causing you pain and frustration. Please provide them with the same dignity and respect which they offer you.

It is our job to improve health, save lives, and create a healthy community regardless of what our patients or colleagues look like, what they believe, who they love, where they come from, and how they got here. Guided by the needs of our patients and the talents of a diverse and inclusive workforce, Duffy is committed to delivering equitable health care in a culturally responsive, compassionate way in order to improve the health and wellbeing of the diverse communities we serve.

Partnering in Care: The Patient Centered Medical Home Model

Duffy Health Center uses a model of care called “Patient Centered Medical Home” (PCMH). Your care team is centered around you, and may include staff from the medical, behavioral, and case management departments.

PCMH means:

- There is a focus on the **partnership** between you, your PCP, and your care team.
- All data and information in possession of any member of my PCMH coordination team, including claims, results of medical and case management encounters, treatments, diagnostic tests, screenings, and prescriptions may be shared among the PCMH coordination team to better coordinate my care and treatment.
- Care is easier to access, coordinated, and comprehensive. Care may include referrals to support services.
- Ensures your preventative, acute, and chronic care needs are met.
- Emphasis on efficient and timely service delivery.

Members of your care team:

- Plan for your appointment by reviewing your record and making sure all required documents are in your chart.
 - You may be asked to provide updated documentation or consent.
- Make sure testing is completed, results are obtained, and you are notified of your results in a timely manner.
- Follow up on referrals. This means tracking if you went to the appointment, that the specialist has the information needed to treat you, and that Duffy Health Center receives the information back from the specialist office.
- If you are in the hospital, care team members will coordinate your care after discharge.

Duffy Health Center Prescribing Practices

Duffy Health Center is dedicated to safe prescribing to improve health. Our providers work with you to do a thorough evaluation and recommend medications with the lowest risk. Your balanced physical and emotional health as well as a mutually satisfied relationship is the goal.

- Evidence shows the combination of psychotherapy and medication provides the best results for mental health conditions; therefore, we may require participation in individual or group therapy.
- We recognize that habit forming medication may be specified in the treatment of specific conditions. You will receive medication information and education to assist you with informed treatment and enable you to participate in shared decision making in treatment options.

A written treatment agreement may be needed for certain medications. Expectations in this agreement may include:

- Frequent visits
- Urine drug screens
- Pill counts

To help this process we ask you to sign consents for previous treatment records. If you are uncomfortable with this practice, we would be happy to provide you with a list of other local care providers.

**Insurance is billed if you have MassHealth Standard, Careplus, or Family assistance.
Other/no insurance is self-pay at the rate reimbursed by MassHealth.**

Proactive Preventive Measures- You can help prevent painful tooth and gum conditions by following some simple steps:

- Brush your teeth at least twice every day.
- Floss your teeth every day.
- If you chew gum, use only sugarless gum.
- Do not use any tobacco products.
- Schedule regular dental cleanings every 6 months (or as advised by your dentist)
